2016 DVD Table of Contents

Disc 1

- **In Memoriam** - AFTE Sickness & Distress Committee
- **AFTE 2016 Keynote Speaker** - G.W. Bailey, Actor
- **AFTE 2017 Update** - Julie Knapp, Colorado Bureau of Investigation
- **Cartridge Case Correspondence Survey: A Study on the Subjectivity and Image Format** - James Stevens, Kansas Bureau of Investigation
- **Identification of Items in Videos and Photos Which Qualify as Firearms versus Toys under Title 18 U.S. Code, 921** - Daniel O'Kelly, International Firearm Specialist Academy
- **The September 1935 Assassination of Huey Long, the Subsequent Shooting of Dr. Carl Austin Weiss, and the Enigmatic Bullet** - Lucien C. Haag, Forensic Science Services
- **New Automated Composite Comparison Score for Bullet Analysis Using High Resolution Optical 3D Surface Metrology** - Cristina Cadevall, Sensofar Tech SL
- **Best Practice and Performance Measures for a 3D Imaging and Analysis System** - Dr. Ryan Lilien, Cadre Forensics
- **Utility Knife Blades: Are They Distinguishable?** - John O'Neil, Independent Consultant
- **A Curious Case of Firing Pin Aperture Shear Marks** - Jessica Winn, California Department of Justice Crime Laboratory
- **Modeling Firearm Toolmark Persistence Through Objective Surface Metrology and Analysis** - Alan Zheng and Daniel Ott, National Institute of Standards and Technology
- **OSAC Updates and Progress** - Andy Smith, San Francisco Police Department and Mark Keisler, Indiana State Police

Disc 2

- **Identification of Bullets Fired from Consecutively Manufactured Double-Broached Ruger SR9c Barrels Utilizing Comparison Microscopy and Confocal Microscopy** - Erich D. Smith & Jennifer L. Stephenson - Federal Bureau of Investigation
- **Leveraging NIBIN as a Real-Time Investigative Tool: The Evolution of the Crime Gun Intelligence Center and Its Impact on Gun Crime and Active Shooters in Denver, Colorado 2013-2016** - Zachary Kotas, Denver Crime Laboratory
- **How Good a Match Is It? Prototype Software to Render Quantitative Statements** - Nicholas D.K. Petraco, John Jay College of Criminal Justice
- **A Case Study of a Tandem Bullet from a Small Caliber Revolver** - Andrew Wheeler, West Virginia University Institute of Technology
- **Visualizing Breech Face and Firing Pin Impression Comparisons Using 3D Surface Topographies and the CMC Method** - Daniel Ott, National Institute of Standards and Technology
- **Glock Marking Barrels** - An Evaluation of Individual and Subclass Characteristics - Omar Felix, Palm Beach County Sheriff's Office

- **MANTIS: Portable Prototype System for the Objective Characterization of Toolmarks** - Dr. Song Zhang, Purdue University
- **Hand Grip Experiment to Determine the Possibility of Accidental Discharge During a Struggle** - NG Kee Sok, Singapore Health Sciences Authority
- **Misfired, Slam-Fired, Snap-Fired, and Drop-Fired Cartridges** - Lucien C. Haag, Forensic Science Services
- **Usage of Computed Tomography Scans for Wound Ballistics Studies** - Nikolas E. Tsiatis, Hellenic Police Forensic Science Division

Disc 3

- **Effect of Velocity on the Level of Expansion and Penetration Depth of Hollow Point Cavities** - Dijana Coric, Washington State Patrol Crime Laboratory
- **Comparison of Manufacturing Marks on Nylon Cable Ties** - Andre Horne, LGC Forensics
- **Evaluation of Recent Daubert/Frye Challenges to Firearm and Tool Mark Identification: Part II** - James E. Hamby, International Forensic Science Laboratory and Training Center
- **So You Don't Own a Confocal…** - Adam Hartley, Forensic Evidence, Inc.
- **Proposed Congruent Matching Profile Segments (CMPS) Method for Bullet Signature Correlations** - John Song, National Institute of Standards and Technology
- **The Reconstruction of a Single Shot Sniper-Type Homicide** - Don Dunbar, California Department of Justice, Retired
- **Electronic Resource Committee (ERC) Developments: GRC/Class Characteristics Matrix Databases and Safety Recall List** - Erica Lawton, Broward Sheriff's Office Crime Laboratory and Adam Grooms, Alabama Department of Forensic Sciences
- **Comparing 6000 Consecutively Fired .40 S&W Bullets and Cartridge Cases from a SIG Sauer P320 Pistol Utilizing Three-Dimensional and 2D+D Imaging and Objective Comparative Analysis** - Erich D. Smith & Jennifer L. Stephenson - Federal Bureau of Investigation
- **Halloween Ambush: An Execution of a Seattle Police Officer** - R.T. Wyant, Washington State Patrol Crime Laboratory
- **The Effects of Measurement Resolution on the Comparison of Tool Mark Topography Data** -Michael Stocker, National Institute of Standards and Technology
- **Shot to the Head Without an Exit Wound** - Dr. Jan Eckert, Bundeskriminalamt
- **Lethality: Complications in Reporting and Testimony in Foreign Countries** - Erica Lawton, Broward Sheriff's Office Crime Laboratory and Andre Horne, LGC Forensics

Disc 4

- **QCMS and Subclass** - Stephen M. Deady, New Jersey State Police
- **Towards More Objective Acquisition & Comparison of Tool and Bullet Marks in Casework** - Martin Baiker and Rene Pieterman, Netherlands Forensic Institute

- **Deformation Analysis Based on Three-Dimensional Finite Element Method for Firing Pin Impression Shape** - Tsutomu Nitobe, National Research Institute of Police Science, Japan
- **NIBIN as an Investigative Tool for Reduction in Violent Gun Crime: A Snapshot of Laboratory Methods and Successes from the Washington State Patrol Crime Laboratory** - Jennifer M. Tardiff and R.T. Wyant, Washington State Patrol Crime Laboratory
- **Different Types of Paintballs in the Market: Their Accessibility Could Be Dangerous in the Wrong Hands** - Hery M. Figueroa Wong, Institute of Forensic Sciences of Puerto Rico
- **Flight of Shotgun Slugs, Part II** - Evan Thompson, Arizona Department of Public Safety Northern Regional Crime Laboratory
- **Comparison of a .45 Auto Caliber Bullet Fired into the Muzzle of a .40 S&W Caliber Barrel** - Alan S. Hammond, Aurora Police Department Crime Laboratory
- **Suicide or Murder? Contact Shots, Gas Dynamics and GSR on Hands** - Axel Manthei, Bavarian State Bureau of Investigation
- **Optimizing Ballistic Imaging Operations** - Lawrence Wein, Stanford University
- **A Study on the Effects of the Break-In Period on Fired Cartridge Cases** - Amanda Gibson, Kansas Bureau of Investigation
